

Press Release

No. 18/ 2006

Date: 11/12/2006

“The Department of Civil Aviation of RAK has finished transferring all the departments of RAK International Airport to the RAK Airport Company under the new privatisation plan”, announced His Highness Engineer Sheikh Salim bin Sultan Al Qasimi, Chairman of Civil Aviation Department of RAK and member of General Authority of Civil Aviation in UAE.

His Highness mentioned that the completion time set from 20th April until 31st December 2006 for the transfer of staff , equipment, building and store in addition to the navigation equipment has been achieved before time.

With this in effect, RAK International Airport has been separated from the Department of Civil Aviation in RAK, where the department will specialise in all federal aviation affairs in RAK. RAK International Airport will contain airport operations, air services, fire department and safety, electronics and electricity.

His Highness assured that this separation will still keep the objectives and goals common between the departments and the airport. He also said that the department will shift premises to a new building during this month.
